DISPOSABLE TAB TYPE ELECTRODE FOR RESTING ECG's

Ag/AgCl & Solid Adhesive Gel provide stable, reliable ECG signals by reason of high tack gel and high conductive Ag/AgCl coating without carbon. Superior adhesion of gel continuously maintains PROTAB for ECG procedure and allows to be repositioned on different skin type.

- Especially designed for use in resting ECG Diagnosis
- Fast application and removal
- Not to be used where defibrillation may be required
- Packaged to give convenient use for end user

Private Label

STERILE LUBRICATING JELLY, 4oz.

Lubricates orifices, preventing friction that can tear delicate tissues. Allows for easy insertion of instruments and gloved fingers into the body without patient discomfort or irritation. Jelly can be easily removed with tissues or a towel.

4 ounce tube is fitted with flip-top cap for ease of use. Tubes combine the integrity of an aluminum barrier with the flexibility of plastic. The result – a product that's both safe and convenient to use.

- **Non-staining**
- **Non-greasy**
- **Non-irritating**
- **Bacteriostatic**
- **Water Soluble**
- **Does not contain chlorhexidine gluconate**

SELF SEAL STERILIZATION PACKAGING

Medical Action Industries pioneered the self seal pouch in the acute care market with a patented self seal product. The perforation through the adhesive gives the only adhesive to adhesive seal in the industry. The resulting seal provides a closure comparable to heat seal products. The unique design eliminates channeling problems associated with many other products on the market.

- **Self Seal that meets Acute Care challenges**
- **Patented Self Seal closure provides triple seal eliminating blowouts**
- **Potential for channeling eliminated**
- **Heat Seal performance with Self Seal convenience**

STERILE SURGICAL SUTURES

Sutures are available in Nylon, Polypropylene, and PGA (synthetic absorbable suture). They are all consistently high quality sharp needles, suture material and packaging. The nylon and polypropylene are used primarily for office based surgery. The PGA sutures are used primarily for subcutaneous skin closure in plastic and dermatologic surgery.

UNNA'S BOOT and UNNA'S BOOT with CALAMINE

Unna's Boot and Unna's Boot with Calamine are indicated for the management of venous leg ulcers, venous edema and minor lower extremity trauma injuries. These lightweight, conforming paste bandages are wrapped on a plastic core and are packaged in vacuum-sealed foil pouches for longer shelf life.

- **Latex-free, non-sterile, flexible cotton bandage**
- **Non-hardening zinc-oxide paste with or without Calamine**
- **Helps soothe inflammations, rashes, ulcers, and related conditions**
